

CS4 In-Row Power Harrow

A unique power harrow designed to cultivate the soil between plants in the row of a vineyard/

orchard. Heavy duty all steel design ensures many years of reliable service.

Heavy duty design & construction. Fully adjustable sensor rod. Hydraulically actuated inclination of tiller head allows implement to operate on hillsides or in terraced vineyards/orchards (except CS4-75 model). Available with 18" or 24" cultivation width (depending on model). 6 model sizes to fit most vineyard/orchard row spacings.

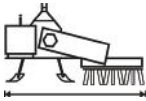

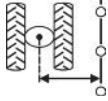

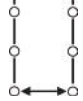

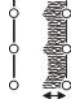

Standard Equipment

- | Cat. 1 & 2 three-point hitch
- | Easy adjustable sensor rod
- | Cat. 6 solid-core driveline with slip-clutch protection
- | 540 rpm PTO gearbox
- | Adjustable skids for depth
